

HOARDINGS360 — App-wise Feature List by Version

2026-09-17 · @Someone

How to read this

Every feature below is listed under the app it belongs to, then by release version, with its module ID (M01-M35) and a priority tag. The Master Product Document v1.0 is the source of truth; where the investor deck gives different timing, this list follows the PRD.

App	What it is	Stack	Primary users
H360 Manage	Owner operating system (web)	React SPA + TypeScript	Owner, ops manager, sales, compliance, finance
H360 Market	Public marketplace + advertiser account (web)	Next.js with SSR/ISR	Brands, agencies, SMEs
H360 Field	Field app (installable PWA, offline)	React PWA + IndexedDB queue	Installers, electricians, supervisors
Platform	Super Admin, public API, white-label	NestJS API, PostgreSQL + PostGIS, Redis	HOARDINGS360 staff, partners

Tag	Meaning
Core	Release-blocking. The version does not ship without it.
Should	May slip within the same release if time runs short.
Later	Named only to stop scope debates; out of scope for that version.

Scope per version is fixed and dates flex. Nothing gets built that is not traceable to a module ID and a version.

Release overview

Eight releases over 24 months; the public marketplace (V2.0) opens only after its inventory gates are met.

Version	Window	Theme	Manage	Market	Field	Platform
V0	Weeks 1-4	Architecture foundation	Login + shell only	—	—	Schema, RLS, event bus, CI/CD, design system
V1.0	Months 2-4	Owner OS core (private beta)	M01-M10, live campaigns, revenue dashboard, board history	—	—	M33 basic
V1.1	Month 5	Field, QR, proof of display	M11, M12, QR, WhatsApp/SMS, client expiry reminders	—	M32	—
V2.0	Months 6-8	Public marketplace launch	Enquiry inbox, holds, price requests, publish controls	M25-M29, cart, combined quote view	—	M33 verification, moderation, CMS
V2.1	Month 9	Media plan + CRM	M13, M14, M15, featured listings, special offers	Featured placement, offers	—	—
V3.0	Months 10-12	Transact	M16, M17, paid-block terms	M30, consolidated quote, paid block	—	M33 billing, payouts, disputes
V4.0	Months 13-16	Enterprise operations	M18-M22, M04 matrix, M11 SLA	Agency accounts	Work orders	—
V5.0	Months 17-24	Intelligence and network	M23, M24, SSO	M31, past advertisers (opt-in)	—	M34, M35

V2.0 entry gates: 3,000+ faces from 25+ verified owners, 85%+ with a photo under 12 months and valid permits, legal pack done, pen test closed, 24-hour SLA signed by every owner, load test at 10× traffic.

H360 Manage — owner platform (web)

Manage carries the most scope: 11 modules at V1.0, growing to 24 by V5.0. The Board 360 page is the centre of the app and ships in V1.0 with empty-but-visible tabs for later modules.

V1.0 — Owner OS core (Months 2-4)

Module	Feature	Priority
M01 Identity & access	Tenant sign-up: company profile, GST no., address, logo, brand colours	Core
M01 Identity & access	Email + password login, email verification, password reset, OTP for privileged role changes	Core
M01 Identity & access	Short-lived JWT + rotating refresh tokens with server-side revocation	Core
M01 Identity & access	Role-based permissions as module.action (e.g. permits.edit, pricing.view_cost)	Core
M01 Identity & access	Invite users with a role; deactivate (never delete); audit of access changes	Core
M01 Identity & access	Geography-scoped roles (supervisor sees only their district)	Should
M02 Asset registry	Board record: system ID, human code (e.g. BLR-HSR-0142), name, configurable structure type	Core
M02 Asset registry	Location: GPS pin, address, landmark, city, district, state, PIN, ward, road name and category	Core
M02 Asset registry	Multiple faces per structure, each with direction, W × H (auto sq ft), illumination, visibility, traffic direction, base rate	Core
M02 Asset registry	Commercials: card rate, floor rate (role-restricted), printing and mounting charges, rate history	Core
M02 Asset registry	Day / night / approach photos with capture date shown as "last verified"; 1+ photo required to publish	Core

Module	Feature	Priority
M02 Asset registry	Lifecycle: install date, ownership type (owned / leased-in / managed for third party), retire with reason	Core
M02 Asset registry	Board 360 page: header with lifecycle, compliance and occupancy badges; map; faces; gallery; occupancy timeline; compliance; agreements; documents; activity	Core
M02 Asset registry	Street-view URL, drone imagery, structural drawings, meter no., "how to reach" note	Should
M03 Document vault	Upload PDF, JPG, PNG, DOCX, XLSX up to 25 MB; virus scan; encrypted at rest	Core
M03 Document vault	Attach to any entity, with document-type taxonomy (licence, NOC, tax receipt, bill, etc.)	Core
M03 Document vault	Versioning: new upload supersedes, full chain browsable	Core
M03 Document vault	Metadata: authority, ref no., issue and expiry dates, amount, signature status, uploader, checksum	Core
M03 Document vault	Search and filter by entity, type, authority, expiry window, ref no.	Core
M03 Document vault	Signed, expiring download links only	Core
M03 Document vault	Drag-and-drop bulk upload with auto-classify by filename	Should
M04 Compliance	Many clearances per board: type, governing body, ref no., dates, renewal cycle, fee, document	Core
M04 Compliance	Tenant-configurable clearance types with platform defaults	Core
M04 Compliance	Computed status (valid / expiring soon / expired / missing / under renewal), rolled up per board and tenant	Core
M04 Compliance	Escalating alerts at 90 / 60 / 30 / 15 / 7 days, then daily; role-based recipients	Core

Module	Feature	Priority
M04 Compliance	Renewal flow: mark under renewal, record application, upload new certificate, old record superseded	Core
M04 Compliance	Risk dashboard: expired, expiring in 30 days, missing docs, with drill-down	Core
M04 Compliance	Expired mandatory clearance auto-unpublishes the face and blocks quoting unless an admin override is audited	Core
M04 Compliance	Per-city renewal checklist templates	Should
M05 Clients & agreements	Client record: name, GST, billing address, industry, contacts, payment terms	Core
M05 Clients & agreements	Agreement: ref, client, campaign (optional until V2.1), dates, value, payment schedule, document, status	Core
M05 Clients & agreements	Line items: many faces per agreement, each with its own rate and dates	Core
M05 Clients & agreements	Versioned revisions, extensions and terminations with reason	Core
M05 Clients & agreements	Renewal alerts at 90 / 60 / 30 / 15 / 7 days to the owning sales executive	Core
M05 Clients & agreements	Search and faceted filters: client, board, city, value, expiry window	Core
M05 Clients & agreements	Payment schedule expected-vs-received flags	Should
M06 Occupancy engine	Occupancy periods per face computed nightly and on every change	Core
M06 Occupancy engine	Occupancy states: vacant, on hold, booked future, occupied, becoming vacant, blocked	Core
M06 Occupancy engine	Availability query: faces free for a continuous date range, by city and type	Core

Module	Feature	Priority
M06 Occupancy engine	Pre-listing window (default 30 days, 0-90): face flagged "Available from <date>" while campaign runs	Core
M06 Occupancy engine	Manual blocks with reason (maintenance, owner reserve, structural work)	Core
M06 Occupancy engine	Reject overlapping agreements, naming the conflicting one	Core
M06 Occupancy engine	Vacancy register: days vacant and revenue foregone at card rate	Core
M06 Occupancy engine	Portfolio availability heat calendar, next 180 days	Should
M07 Notifications	Rules: event → conditions → recipient roles → channels → template	Core
M07 Notifications	In-app notification centre and transactional email	Core
M07 Notifications	Per-user preferences and digest (immediate / daily / weekly)	Core
M07 Notifications	Delivery log with status and retries, visible to tenant admin	Core
M07 Notifications	Escalate unacknowledged critical alerts to the next role up	Should
M08 Activity & audit	Per-entity timeline and tenant-wide activity feed	Core
M08 Activity & audit	Field-level change history (who, what, when, from, to, why) for agreements, permits, pricing, specs	Core
M08 Activity & audit	Filter by entity, user, date, event type; CSV export	Core
M08 Activity & audit	Retention settings and legal-hold flag	Should
M09 Dashboard	Portfolio summary: structures, faces, occupied, vacant, occupancy %, month-on-month trend	Core
M09 Dashboard	Risk strip: permits expired / expiring, missing docs, boards with no photo or no rate	Core

Module	Feature	Priority
M09 Dashboard	Commercial strip: contracts ending in 30 / 60 / 90 days with value at risk; contracted revenue this and next month	Core
M09 Dashboard	Vacancy loss ranked worst-first	Core
M09 Dashboard	Portfolio map coloured by occupancy and compliance, with clustering	Core
M09 Dashboard	Exports: inventory, occupancy, compliance, contract and vacancy registers (CSV / Excel)	Core
M09 Dashboard	Saved views	Should
M10 Bulk import	Downloadable template: boards, faces, clients, agreements, permits	Core
M10 Bulk import	Guided flow: upload → map columns → validation preview → confirm → summary	Core
M10 Bulk import	Validation: required fields, coordinates inside India and the stated city, date logic, duplicates within 25 m or by name	Core
M10 Bulk import	Partial import; failed rows returned as a correction file with an error column	Core
M10 Bulk import	Forgiving input: DD-MM-YYYY, DD/MM/YYYY, Excel dates; "45k" or "₹45,000"; decimal degrees or a Google Maps link	Core
M10 Bulk import	Bulk photo upload matched to boards by filename	Core
M10 Bulk import	Onboarding tracker: % of boards with GPS, photo, rate, permit, agreement	Core
M09 Dashboard	Role-wise dashboards: a default home per role showing only what that role may see	Core
M09 Dashboard	Live campaigns view: every running agreement with client, faces, start and end dates, days left	Core
M09 Dashboard	Revenue dashboard: contracted revenue by month, board, client and district	Core

Module	Feature	Priority
M09 Dashboard	Gross revenue per board and per face from agreement values (costs netted off from V4.0)	Core
M06 Occupancy engine	Upcoming vacancies view: faces going vacant in the next 30 / 60 / 90 days, with the free-from date	Core
M02 Board 360	History tab: past and current campaigns plus uploaded tax receipts, electricity bills and maintenance records on one timeline	Core

V1.1 — Field, QR and proof (Month 5)

Module	Feature	Priority
M02 Asset registry	QR code generated per structure for weatherproof stickers	Core
M07 Notifications	WhatsApp Business API and SMS channels (templates submitted in Sprint 1)	Core
M11 Incidents	Log an incident on a board or face from web or mobile; photos mandatory	Core
M11 Incidents	Configurable categories: structural, visibility, electrical, operational, other	Core
M11 Incidents	Severity, reporter, description; affected campaign auto-linked	Core
M11 Incidents	Lifecycle reported → triaged → assigned → in progress → resolved → verified → closed; after-photo required	Core
M11 Incidents	Incident dashboard: open by severity, ageing, repeat boards, resolution time	Core
M11 Incidents	Account manager notified when the affected face is occupied	Core
M11 Incidents	Public report link via QR, no account needed	Should
M12 Proof of display	Required evidence set per campaign: day, night (lit sites), approach, close-up	Core

Module	Feature	Priority
M12 Proof of display	Geo-check within 150 m (configurable); outside goes to supervisor review	Core
M12 Proof of display	Branded proof-pack PDF per campaign with photos, coordinates, timestamps, map; shareable link	Core
M12 Proof of display	Periodic re-verification captures during long campaigns	Core
M02 Board 360	Incidents and Proof of display tabs go live	Core
M05 Clients & agreements	Contract expiry reminders sent to the client's contact by email and WhatsApp at set days before end; on or off per client	Core

V2.0 — Marketplace launch (Months 6–8)

Module	Feature	Priority
M26 Listing controls	Per-tenant rate display policy (card rate, band, on request) with per-board override	Core
M28 Enquiries	Owner enquiry inbox: respond with rates, threaded messages, 24-hour SLA timer	Core
M28 Enquiries	Unanswered enquiries escalate to company admin after 24 hours	Core
M29 Holds	Accept or decline advertiser hold requests; set hold length (48 h default, up to 7 days)	Core
M06 Occupancy engine	"Available from <date>" pre-listing now publishes publicly	Core
M02 Board 360	Marketplace tab: published state, views, enquiries received	Core
M26 Price on request	Price-request inbox with a countdown to the reply deadline (default 24 h, set per tenant)	Core

V2.1 — Media plan and CRM (Month 9)

Module	Feature	Priority
M13 Campaigns	Campaign record: client, name, brand, objective, dates, value, status, sales owner	Core
M13 Campaigns	Many faces per campaign, each with its own dates and rate; join or leave mid-flight	Core
M13 Campaigns	Campaign calendar and Gantt view	Core
M13 Campaigns	Installation and removal tasks auto-created from campaign dates	Core
M13 Campaigns	Campaign-level proof pack across all faces	Core
M13 Campaigns	Extend, reduce and cancel flows with occupancy recalculated	Core
M13 Campaigns	Campaign templates for repeat clients; multi-city grouping	Should
M14 CRM	Leads from marketplace enquiries, manual entry and CSV, with source	Core
M14 CRM	Configurable pipeline: new → qualified → proposal sent → negotiation → won / lost with reasons	Core
M14 CRM	Client 360: contacts, campaign history, spend, deal size, agreements, invoices, communication log	Core
M14 CRM	Communication log for calls, meetings, emails, WhatsApp	Core
M14 CRM	Renewal follow-up tasks auto-created from expiring agreements	Core
M14 CRM	Enquiry response SLA tracking	Core
M14 CRM	Sales targets and per-executive performance dashboard	Should
M15 Media plan builder	Pick faces from map or list, filtered by availability, into a named plan	Core

Module	Feature	Priority
M15 Media plan builder	Edit plan: period, per-face or plan discount, printing and mounting, totals with and without GST	Core
M15 Media plan builder	Branded PDF: cover, summary, map of all pins, one page per site, commercial terms	Core
M15 Media plan builder	Editable PPTX export	Core
M15 Media plan builder	Shareable client link: approve or reject sites, comment; owner notified on view and action	Core
M15 Media plan builder	One-click convert approved plan to campaign (and to quotation from V3.0)	Core
M15 Media plan builder	Plan templates; alternative suggestions for unavailable faces	Should
Featured listings	Owners buy promoted placement in search and on the map	Core
Special offers	Create time-bound offers (discount, free printing or mounting) on chosen faces, e.g. boards going vacant	Core
Special offers	Push offers to past clients and matching advertiser saved searches by email and WhatsApp; track opens and enquiries	Core

V3.0 — Transact (Months 10–12)

Module	Feature	Priority
M16 Quotes & bookings	Quotation from a plan: validity, terms, taxes, approval above a value threshold	Core
M16 Quotes & bookings	Versioned negotiation history with reasons	Core
M16 Quotes & bookings	Acceptance creates a booking, holds the faces and blocks conflicting sales	Core
M16 Quotes & bookings	Agreement PDF from templates with merge fields	Core

Module	Feature	Priority
M16 Quotes & bookings	E-signature (Aadhaar eSign + fallback) with status and completion certificate in vault	Core
M16 Quotes & bookings	Send via email, WhatsApp or download	Core
M16 Quotes & bookings	Cancellation and amendment with configurable policy; occupancy released	Core
M16 Quotes & bookings	Separate template sets for client and landowner agreements	Should
M17 Invoicing & GST	GST invoices: CGST / SGST / IGST by place of supply, HSN/SAC, numbering per financial year	Core
M17 Invoicing & GST	Collections via UPI, cards, net banking; NEFT/RTGS reconciliation	Core
M17 Invoicing & GST	Receipts, credit notes, partial payments, advances, refunds	Core
M17 Invoicing & GST	Receivables ageing, overdue reminders (7 / 15 / 30 days), collections worklist	Core
M17 Invoicing & GST	Commission on marketplace-originated bookings with an itemised owner statement	Core
M17 Invoicing & GST	Export to Tally and Zoho Books	Core
M17 Invoicing & GST	E-invoicing (IRN / QR) above statutory threshold	Should
M17 Invoicing & GST	Escrow / payment protection	Later
M01 Identity & access	Finance Officer role	Core
M09 Dashboard	Revenue dashboard adds invoiced, collected and outstanding by client and board	Core
M29 Holds	Paid-block terms per board: advance amount or %, lock duration, refund policy	Core

V4.0 — Enterprise operations (Months 13-16)

Module	Feature	Priority
M18 Work orders	Auto-created from incidents and campaigns, or manual	Core
M18 Work orders	Types: install, replace, remove creative; lighting and structural repair; cleaning; inspection; tree pruning; permit site work	Core
M18 Work orders	Assign to technicians, crews or vendors by skill and geography	Core
M18 Work orders	SLA targets per type with breach alerts and escalation	Core
M18 Work orders	Scheduling board: today's jobs by technician and area, drag-and-drop reassignment	Core
M18 Work orders	Performance: jobs closed, time to close, first-time fix, SLA compliance per technician and vendor	Core
M18 Work orders	Route optimisation; material usage tracking (flex rolls, lamps)	Should
M19 Leases & expenses	Landowner records: individual, company or authority; bank details; PAN / GST	Core
M19 Leases & expenses	Lease per board: dates, rent basis (fixed, revenue share, hybrid), escalation, frequency, notice, document	Core
M19 Leases & expenses	Rent schedule, critical due alerts at 15 / 7 / 1 days, payment recording	Core
M19 Leases & expenses	Utility accounts: consumer no., meter, provider, sanctioned load; monthly bills and payments	Core
M19 Leases & expenses	Other opex per board: maintenance, repainting, security, municipal fees, insurance	Core
M19 Leases & expenses	Read-only landowner portal	Should
M20 Vendors	Vendor master: printers, fabricators, electricians, crane operators, with rate cards and service area	Core

Module	Feature	Priority
M20 Vendors	Purchase orders linked to work orders and campaigns, with approval thresholds	Core
M20 Vendors	Vendor invoice matching against POs and completed work	Core
M20 Vendors	Vendor scores: cost variance, on-time, rework, quality	Core
M20 Vendors	Vendor portal to accept jobs and upload evidence	Should
M21 Health score	0-100 score from compliance, condition, lighting, visibility, occupancy, contract, docs, last verification	Core
M21 Health score	Bands healthy / attention / critical, same colours across dashboards and maps	Core
M21 Health score	Score history per board; "worst 20 boards this week" worklist	Core
M22 Profitability	Revenue recognised per face per month	Core
M22 Profitability	Cost allocation per board: rent, electricity, maintenance, fees, installation, insurance, depreciation	Core
M22 Profitability	Net margin per board, face, district, city, client and structure type	Core
M22 Profitability	Rolling 12-month vacancy loss; top-5 client concentration	Core
M22 Profitability	12-month revenue forecast vs fixed costs	Core
M22 Profitability	Break-even and payback per structure	Should
M04 Compliance	Compliance matrix grid (boards × clearance types) and tenant compliance score	Core
M11 Incidents	SLA per category, auto-dispatch to on-call technician, breach escalation	Core
M03 Document vault	OCR of expiry dates and reference numbers	Later

Module	Feature	Priority
M02 Board 360	Health score badge; Landowner & costs and Profitability tabs go live	Core
M02 Board 360	History tab gains amounts: local body tax paid, electricity usage and bills, maintenance spend per board	Core

V5.0 — Intelligence and network (Months 17–24)

Module	Feature	Priority
M23 BI & heatmaps	Heatmaps: revenue density, occupancy, marketplace demand, vacancy	Core
M23 BI & heatmaps	Seasonality by month, category and city; renewal probability by client segment	Core
M23 BI & heatmaps	Anonymised, opt-in market rate and occupancy benchmarks	Core
M23 BI & heatmaps	Custom report builder with scheduled email; Excel and PDF export	Core
M24 AI pricing	Rate recommendation per face with a plain explanation, never auto-applied	Core
M24 AI pricing	Vacancy probability for next 30 / 60 / 90 days, feeding sales worklists	Core
M24 AI pricing	Client renewal propensity and churn-risk alerts	Core
M24 AI pricing	Every model output explainable, overridable and logged	Core
M01 Identity & access	SAML / OIDC single sign-on and SCIM provisioning	Core

H360 Market — public marketplace and advertiser (web)

Market has no user-facing build before V2.0 and launches only when the inventory gates pass. It reads from a cached marketplace projection, never from live owner tables.

V2.0 — Marketplace launch (Months 6–8)

Module	Feature	Priority
M25 Map & search	Full-screen map with clustering, smooth at 25,000+ boards	Core
M25 Map & search	Filters: city, locality, road or highway, structure type, size band, illumination, date range, monthly budget, orientation, verified	Core
M25 Map & search	Sort: relevance, price up / down, size, availability date, recently verified	Core
M25 Map & search	Draw an area on the map; radius search around a point or landmark	Core
M25 Map & search	Map and list stay in sync; shareable URLs keep the full filter state	Core
M25 Map & search	Campaign dates return only faces free for the whole period	Core
M25 Map & search	Corridor search along a route; saved searches with email alerts	Should
M26 Listing detail	Photo gallery (day, night, approach) with capture dates	Core
M26 Listing detail	Specs: dimensions, sq ft, illumination, orientation, visibility, type, road and traffic context	Core
M26 Listing detail	Map pin, locality, landmark, approximate address; exact coordinates only for verified advertisers	Core
M26 Listing detail	Price shown per owner policy: card rate, band or on request	Core
M26 Listing detail	180-day availability calendar (available, booked, on hold) and "Available from <date>" badge	Core
M26 Listing detail	Trust signals: Verified badge, last verified date, permit-valid mark, owner response time	Core
M26 Listing detail	Actions: add to shortlist, request quote, request hold, share, download one-page site PDF	Core

Module	Feature	Priority
M26 Listing detail	Similar and nearby boards; "others also enquired"	Should
M27 SEO & content	Server-rendered pages per city, locality, highway, type and city × type	Core
M27 SEO & content	Each page shows live inventory counts, price ranges, map, sample sites, internal links	Core
M27 SEO & content	Structured data, auto-updated XML sitemaps, canonical URLs, robots rules against filter crawl traps	Core
M27 SEO & content	LCP under 2.5 s on mid-range Android over 4G	Core
M27 SEO & content	Editorial hub: city rate guides, format explainers, permit guidance, case studies	Core
M27 SEO & content	Live inventory counter (boards · verified owners · cities)	Core
M27 SEO & content	Regional-language pages	Should
M28 Account & enquiry	Sign-up with email / mobile OTP; company profile; optional GST	Core
M28 Account & enquiry	Shortlist across owners with notes, campaign period and budget	Core
M28 Account & enquiry	One enquiry across many owners, split so no owner sees another's boards or prices	Core
M28 Account & enquiry	Advertiser inbox with owner replies, quoted rates and threaded messages	Core
M28 Account & enquiry	Owner response time shown; chronic non-responders ranked lower	Core
M28 Account & enquiry	Anti-spam: OTP, rate limits, CAPTCHA on enquiry, duplicate detection, moderation	Core
M28 Account & enquiry	Upload a brief, routed to a human planner	Should
M29 Hold & reservation	Request a hold on one or more faces	Core
M29 Hold & reservation	Accepted hold hides the face from other buyers for its duration	Core

Module	Feature	Priority
M29 Hold & reservation	Auto-expiry with reminder 6 hours before, to both sides	Core
M29 Hold & reservation	Per-advertiser hold limits; hold-to-conversion rate visible to owners	Core
M25 Map & search	Location search box with autocomplete for area, road or landmark; results open on the map	Core
M28 Account & enquiry	Cart: add boards from any owner and any city; indicative total at card rates, price-on-request boards marked pending	Core
M28 Account & enquiry	Request a full quote for the whole cart; owner replies gather into one combined quote view with a running total	Core
M26 Listing detail	Price on request: owner must reply within a set time (default 24 h); countdown shown to advertiser; late replies escalate and lower ranking	Core

V2.1 — Media plan and CRM (Month 9)

Module	Feature	Priority
Featured listings	Promoted boards marked and ranked higher in search and on the map	Core
M15 Client plan view	Advertiser opens an owner's shared plan, approves or rejects sites, comments	Core
Special offers	Offer badge and end date on listings; "On offer" filter in search	Core

V3.0 — Transact (Months 10–12)

Module	Feature	Priority
M16 Quotes & bookings	View and accept quotations; e-sign agreements on mobile	Core

Module	Feature	Priority
M17 Payments	Pay invoices via UPI, cards, net banking; payment history and receipts	Core
M30 Campaign portal	Campaign dashboard: sites booked, period, per-site status (pending installation, live, done), days left	Core
M30 Campaign portal	Proof-of-display photos delivered automatically as captured; campaign proof pack download	Core
M30 Campaign portal	Documents: agreement, invoices, receipts, payment status	Core
M30 Campaign portal	Report a site problem, which creates an incident in the owner's system	Core
M30 Campaign portal	Post-campaign report for the advertiser's own client	Should
M28 Account & enquiry	Agency sub-users under one advertiser org	Core
M26 Listing detail	Owner rating on listings	Core
M16 Quotes & bookings	One consolidated quote document across all owners in the cart, with GST; accept all or per board	Core
M29 Holds	Paid block: pay an advance to lock campaign dates beyond the free hold; adjusted against the booking, refunded per owner policy	Core

V4.0 — Agency accounts (Months 13–16)

Module	Feature	Priority
Agency accounts	Agency sign-up as a separate account type, verified by the platform	Core
Agency accounts	Multi-client workspace: carts, plans and campaigns kept per end client	Core

Module	Feature	Priority
Agency accounts	Agency-branded quote to their client with agency commission added; the client never sees owner net rates	Core
Agency accounts	Agency commission report per client and campaign	Should

V5.0 — Intelligence and network (Months 17–24)

Module	Feature	Priority
M31 Audience data	Traffic and footfall estimates per site from partner or municipal data	Core
M31 Audience data	Impression and reach estimates per site and per plan, with published method and confidence level	Core
M31 Audience data	Modelled numbers always labelled as estimates, never as measured	Core
Board history	Past advertisers on a listing (brand names and months only, never values), shown only where the owner opts in	Should

H360 Field — mobile app (PWA)

Field ships as an installable PWA in V1.1 and gains work orders in V4.0; native apps are reassessed only at V4.0. Offline capture is a Core requirement, since many sites have poor coverage.

V1.1 — Field, QR and proof (Month 5)

Module	Feature	Priority
M32 Field app	Long-lived login suited to field use; device binding for technicians	Core

Module	Feature	Priority
M32 Field app	Scan the QR sticker on a structure to open that board instantly	Core
M32 Field app	Today's tasks grouped by area, with hand-off to the phone's maps app	Core
M32 Field app	In-app camera only (gallery off by default), stamping GPS, device time, server time and technician	Core
M32 Field app	Image compression before upload; under 8 s per photo on 4G	Core
M32 Field app	Offline capture queue with auto-sync and clear pending / synced indicators	Core
M32 Field app	Board survey mode: photos, GPS, dimensions and type captured in under 90 seconds	Core
M32 Field app	Report an incident with photos from site	Core
M12 Proof of display	Guided capture of the required set: day, night, approach, close-up	Core
M12 Proof of display	Flag captures taken outside the 150 m radius for supervisor review	Core
M12 Proof of display	Blur, darkness and obstruction checks with a re-capture prompt	Should
M32 Field app	Low-data mode	Should
M32 Field app	Regional-language interface for technicians (Malayalam, Tamil, Kannada, Telugu, Hindi assessed at V2.0)	Should

V4.0 — Enterprise operations (Months 13-16)

Module	Feature	Priority
M18 Work orders	Receive and accept assigned work orders	Core

Module	Feature	Priority
M18 Work orders	Status flow: accepted → en route → on site → completed	Core
M18 Work orders	GPS check-in required on arrival; check-out on completion	Core
M18 Work orders	Before and after photos, materials used, completion notes	Core
M18 Work orders	Supervisor verifies and closes jobs in their area	Core
M18 Work orders	Multi-stop route for the day	Should

Platform — Super Admin, API and white-label

Super Admin (M33) is an internal app for HOARDINGS360 staff that grows with each release; the public API and white-label arrive together in V5.0.

Version	Module	Feature	Priority
V1.0	M33 Super Admin	Create, suspend and configure tenants; assign plans; per-tenant feature flags	Core
V1.0	M33 Super Admin	Platform health: job queues, event bus lag, failed notifications, error rates, storage	Core
V1.0	M33 Super Admin	Support impersonation: time-boxed, reason required, fully audited	Core
V2.0	M33 Super Admin	Owner verification: company registration, GST, sample permits, site evidence, spot-check 5 boards; issue Verified badge	Core
V2.0	M33 Super Admin	Listing moderation: flagged listings, photo quality, same structure claimed by two tenants	Core
V2.0	M33 Super Admin	Content management: SEO pages, editorial content, cities, taxonomy defaults	Core
V2.0	M33 Super Admin	Platform analytics: supply growth, data completeness, demand funnel	Core

Version	Module	Feature	Priority
V2.0	M33 Super Admin	Quarterly re-verification prompt when a verified owner's listing photos go stale	Core
V2.0	M33 Super Admin	Lead-fee billing for qualified, accepted enquiries	Core
V2.0	M01 Identity & access	Platform Support Agent role (read-mostly, logged cross-tenant access)	Core
V3.0	M33 Super Admin	Subscription billing: plans, invoices, dunning, upgrades	Core
V3.0	M33 Super Admin	Commission statements and owner payouts	Core
V3.0	M33 Super Admin	Dispute case file combining enquiry, booking, proof and messages	Core
V3.0	M33 Super Admin	Analytics extended with GMV, take rate, leakage and cohort retention	Core
V5.0	M34 Public API	Versioned REST API with OAuth2 client credentials, per-client rate limits, usage analytics	Core
V5.0	M34 Public API	Read inventory, availability and pricing; write enquiries and bookings	Core
V5.0	M34 Public API	Signed outbound webhooks for catalogue events, with retries and delivery log	Core
V5.0	M34 Public API	Supply feed for programmatic DOOH partners and agency planning tools	Core
V5.0	M34 Public API	Developer portal and sandbox	Core
V5.0	M35 White-label	Custom domain, full brand theming, tenant-branded advertiser pages	Core
V5.0	M35 White-label	SAML / OIDC SSO, SCIM, IP allow-listing, configurable retention	Core
V5.0	M35 White-label	Optional dedicated database or region	Core
V5.0	M35 White-label	Contractual SLA with credits and named support manager	Core

Foundations — V0 (Sprint 0, weeks 1-4)

V0 ships no customer screens beyond login and a shell, but every later feature depends on it. These items apply to all apps and cannot be cut for schedule.

Area	What must exist	Used by
Multi-tenancy	tenant_id on every business table; PostgreSQL Row-Level Security; cross-tenant test suite blocking every build	All apps
Schema	All V1.0 entities plus reserved tables: campaigns, board_faces, leases, work_orders, expenses, vendors	All apps
Geospatial	PostGIS point per board with GiST index; radius, box and corridor queries	Manage map, Market, Field
Event bus	Redis Streams / BullMQ; versioned immutable events; idempotent consumers; retries, dead-letter queue, replay tool	Notifications, audit, marketplace projection
State machines	One transition service with configured states; never compare status strings in frontend code	All apps
Shared services	Attachments, comments and timeline built once and composed into every entity screen	Manage, Field
Documents	One polymorphic documents service; files in S3, metadata in DB, soft delete	All apps
Audit	Append-only activity_events; no update or delete path	Manage, Super Admin

Area	What must exist	Used by
Configuration	Alert thresholds, board types, clearance types, incident categories, SLAs, commission % as tenant config with platform defaults	All apps
API	Versioned REST v1 with published OpenAPI spec; all three apps are clients of the same API	All apps
Data conventions	Money in paise (bigint); timestamps UTC timestamp tz, business dates in IST; UUID keys + human board codes; soft delete with reason	All apps
Delivery	Local, dev, staging, production; CI/CD; reversible migrations; per-tenant feature flags; structured logs and metrics	Engineering
Design system	Component library and tokens for all three apps	UI/UX

Three status axes stay separate everywhere: lifecycle (is it usable?), compliance (is it legal?) and occupancy (is it sold?). A face can be active, non-compliant and occupied at once, and the UI must show all three.

UI/UX notes

The Board 360 page is the most important screen and the core sales demo; the owner dashboard is the screen owners should open every morning.

Key screens by version

Version	App	Screens to design
V0	All	Design system, login, app shell

Version	App	Screens to design
V1.0	Manage	Role-wise dashboards, live campaigns, revenue dashboard, upcoming vacancies, portfolio map, board list, Board 360 (incl. History tab; later tabs empty-but-visible), add/edit board and faces, compliance records and risk dashboard, clients, agreements, document vault, notification centre, activity feed, import wizard, onboarding tracker, users and roles
V1.0	Super Admin	Tenant list, tenant settings and feature flags, platform health, impersonation
V1.1	Field	Login, today's tasks, QR scan, board view, guided photo capture, offline sync status, survey mode, incident report
V1.1	Manage	Incident list and detail, proof-of-display review, proof-pack PDF template, client reminder settings
V2.0	Market	Home and SEO landing templates, location search, map search with filters, listing detail with calendar, cart, combined quote view, price request, sign-up with OTP, advertiser inbox, holds
V2.0	Manage	Owner enquiry inbox, price-request inbox, hold requests, marketplace settings and rate display policy
V2.0	Super Admin	Owner verification queue, listing moderation, duplicate resolution, CMS
V2.1	Manage	Campaign list, Gantt, CRM pipeline, client 360, media plan builder, PDF and PPTX templates, special offer creation and push
V2.1	Market	Shared client plan view (approve / reject / comment), offer badges and filter
V3.0	Manage	Quotation, booking, agreement templates, e-sign status, invoices, payments, receivables ageing, commission statement, paid-block terms

Version	App	Screens to design
V3.0	Market	Consolidated quote, quote acceptance, e-sign, checkout and paid block, campaign portal, issue reporting
V4.0	Manage	Work order scheduling board, leases, utilities and expenses, vendors and POs, health score views, compliance matrix, profitability reports, Board 360 History with cost amounts
V4.0	Market	Agency sign-up, multi-client workspace, agency-branded quote with commission
V4.0	Field	Work order accept, check-in, before / after capture, completion
V5.0	Manage / Market / Platform	BI heatmaps, report builder, pricing and vacancy suggestions with explanations, past advertisers on listings, developer portal, white-label theming

Roles to design for

Role	App	From
Company Admin, Operations Manager, Sales Executive, Compliance Officer	Manage	V1.0
Platform Super Admin	Super Admin	V1.0
Field Supervisor, Field Technician	Field	V1.1
Registered Advertiser	Market	V2.0
Platform Support Agent	Super Admin	V2.0
Finance Officer	Manage	V3.0
Advertiser Sub-user	Market	V3.0
Landowner (read-only)	Manage portal	V4.0

Sales users see card rates but never floor rates or cost data; technicians see only their own tasks.

Design rules

- Show lifecycle, compliance and occupancy as three separate badges, never one combined status.
- Indian formats throughout: ₹ with lakh / crore grouping, DD-MM-YYYY, Indian mobile validation, IST.
- Field app is mobile-first for one-handed use in sunlight: high contrast, large touch targets.
- Owner platform must work on tablets; every surface is responsive.
- Marketplace pages target WCAG 2.1 AA and LCP under 2.5 s on mid-range Android.
- Every destructive action asks for confirmation, long actions show progress, and every error says what to do next.
- Status colours come from configuration, never hardcoded labels; health bands use one colour language across maps and dashboards.
- Performance budgets to design within: owner dashboard under 2 s, marketplace map interactive under 3 s, availability search under 800 ms.

Product brain dump — where each item landed

Of 16 brain-dump items, 5 were already in the PRD (2 of those got extra detail) and 11 were added as new rows in the app sections above. Rows added to V1.0 grow its scope, so the V1.0 timeline should be re-checked.

App	Item	Status	Where	Version
Manage	Onboard boards	Already covered	M10 Bulk import, M02 Asset registry	V1.0
Manage	Live campaigns	Added	M09 live campaigns view; full campaigns in M13	V1.0, V2.1
Manage	Enquiries	Already covered	M28 owner enquiry inbox; M14 CRM leads	V2.0, V2.1
Manage	Revenue per board	Added	M09 gross revenue per board; net of costs in M22	V1.0, V4.0

App	Item	Status	Where	Version
Manage	Board history (campaigns, taxes, electricity, maintenance)	Added	Board 360 History tab; cost amounts via M19	V1.0, V4.0
Manage	Revenue dashboard	Added	M09 revenue dashboard; invoiced vs collected	V1.0, V3.0
Manage	Role-wise access and dashboards	Added	M01 RBAC; role-wise dashboards promoted to Core	V1.0
Manage	Invoicing and agreements	Already covered	M05 agreements; M16 contracts; M17 GST invoicing	V1.0, V3.0
Manage	Contract expiry reminders to clients	Added	M05 client-facing reminders (PRD only alerted internal staff)	V1.1
Manage	Special offers pushing	Added	New Special offers feature	V2.1
Manage	See when a board goes vacant	Already covered + view added	M06 occupancy engine; upcoming vacancies view	V1.0
Market	Multi-board cart across owners and cities, full quote	Added	Cart and combined quote view; consolidated quote document	V2.0, V3.0
Market	Block campaign period by payment	Added	Paid block on top of free 48 h hold	V3.0
Market	Agency login with own commission in quotes	Added	Agency accounts	V4.0
Market	Type a location and pick boards; past advertisers	Added	Location search box; past advertisers opt-in	V2.0, V5.0

App	Item	Status	Where	Version
Market	Owner hides price, gives it on request within a time limit	Already covered + detail added	M26 price policy; timed price-request flow	V2.0

Two open points: paid blocks and consolidated quotes depend on OQ-5 (whether the platform holds funds or routes payment straight to each owner). Showing past advertisers conflicts with the PRD rule that client names are never public, so it stays owner opt-in and may also need client consent.
