

HOARDINGS360 — UI/UX Flows & Features: Manage and Marketplace

2026-09-17 · @Someone

Design foundations

Manage is a daily operating tool for media owners; Marketplace is a public buying experience for advertisers. Both read the same board data, so a board must look and behave the same in both. Version tags (V1.0-V5.0) follow the App-wise Feature List.

Who we design for

Persona	App	Job to be done	Success looks like
Rajesh, Managing Director (220 boards)	Manage	Know occupancy, risk and revenue at a glance	Opens the dashboard every morning
Priya, Operations Manager	Manage	Every campaign up on time, every issue closed	WhatsApp group traffic drops
Arun, Sales Executive	Manage	Answer briefs fast, never quote a booked board	Proposal in under 10 minutes
Deepa, Compliance Officer	Manage	Zero expired clearances; any document in a minute	No surprise notices
Meera, Agency Media Planner	Marketplace	Multi-city plan in 48 hours with proof afterwards	Starts plans on H360, not a spreadsheet
SME / brand buyer	Marketplace	Find a few boards in one city within budget	Enquires without a phone call

Roles and what they see

Role	App	Sees	Never sees
Company Admin	Manage	Everything in the tenant, users, settings	Other tenants
Operations Manager	Manage	Boards, incidents, proof, field staff	User admin
Sales Executive	Manage	Clients, agreements, enquiries, plans, card rates	Floor rates, cost data
Compliance Officer	Manage	Permits, documents, risk dashboard	Floor rates
Finance Officer (V3.0)	Manage	Invoices, payments, costs, profitability	User admin
Advertiser	Marketplace	Published listings, own cart, quotes, campaigns	Owner floor rates, other buyers' quotes
Agency (V4.0)	Marketplace	Advertiser view plus client workspaces and commission	Owner cost data

Each role lands on its own dashboard, and hidden features are removed from navigation, not shown disabled.

The three-status model

Every board face carries three independent statuses, always shown as three separate badges.

Axis	Question	Values	Badge colour idea
Lifecycle	Is the structure usable?	Draft, pending verification, active, under maintenance, blocked, non-compliant, retired	Neutral grey scale
Compliance	Is it legal?	Valid, expiring soon, expired, missing, under renewal	Green / amber / red

Axis	Question	Values	Badge colour idea
Occupancy	Is it sold?	Vacant, becoming vacant, on hold, booked future, occupied, blocked	Blue family

A face can be active, expired and occupied at the same time; that combination is the one owners most need to notice.

Design rules

- Board is the centre: every list row and map pin opens Board 360 (Manage) or Listing detail (Marketplace).
- Indian formats: ₹ with lakh / crore grouping, DD-MM-YYYY, IST, +91 mobile validation.
- Manage works on desktop and tablet; Marketplace is mobile-first with WCAG 2.1 AA.
- Performance budgets: owner dashboard under 2 s, marketplace map interactive under 3 s, search under 800 ms, landing pages LCP under 2.5 s.
- Confirm every destructive action; show progress on long actions; every error says what to do next.
- Nothing is deleted: use Retire, Deactivate, Supersede and Cancel with a reason.
- Status labels, categories and thresholds come from configuration, so never hardcode lists in designs.
- WhatsApp is the main alert channel; design message templates alongside screens.

Manage — navigation and sitemap

Manage uses a left sidebar with eight groups and a top bar for global search, quick add, notifications and profile. Groups a role cannot use are hidden.

flowchart LR

```

    Top[Top bar<br/>search · quick add · alerts]
    Home[Dashboard<br/>role-wise]
    Home --> B[Boards]
    Home --> C[Compliance]
    Home --> S[Sales]
    Home --> O[Operations]
    Home --> F[Finance]
    Home --> R[Reports]
    Home --> X[Settings]
    B --> B360[Board 360]
    S --> B360
    C --> B360
    O --> B360
  
```

Board 360 is reachable from every group, so treat it as the hub rather than a leaf.

Group	Pages	From
Dashboard	Role-wise home: portfolio summary, risk strip, commercial strip, live campaigns, upcoming vacancies, vacancy loss, portfolio map	V1.0
Boards	Board list · Board map · Board 360 · Add / edit board and faces · Bulk import · Onboarding tracker · Upcoming vacancies	V1.0
Compliance	Risk dashboard · Permits list · Renewal queue · Document vault	V1.0
Compliance	Compliance matrix	V4.0
Sales	Clients · Agreements	V1.0
Sales	Enquiries inbox · Price requests · Hold requests	V2.0
Sales	Campaigns · CRM pipeline · Media plans · Special offers	V2.1
Sales	Quotations · Bookings	V3.0
Operations	Incidents · Proof of display	V1.1
Operations	Work orders · Scheduling board · Vendors · Health score	V4.0

Group	Pages	From
Finance	Invoices · Payments · Receivables · Commission statements	V3.0
Finance	Landowners and leases · Utilities and expenses · Profitability	V4.0
Reports	Revenue dashboard · Vacancy report · Standard exports	V1.0
Reports	BI heatmaps · Report builder · Pricing and vacancy insights	V5.0
Settings	Company profile · Users and roles · Notification rules · Taxonomies (board types, clearance types) · Activity log	V1.0
Settings	Marketplace settings (rate display, pre-listing window, response time)	V2.0
Settings	Document and agreement templates · Tax and invoice series	V3.0

Global elements on every page: search by board code, client or agreement ref; quick add (board, agreement, permit, incident); notification centre; entity-level comments and attachments.

Manage — key user flows

Eight flows cover most of Manage; prototype flows 1–3 first because they carry the V1.0 sales demo.

Flow 1 — Owner onboarding (V1.0)

flowchart LR

```

A[Sign up +<br/>verify email] --> B[Company profile<br/>GST, logo]
B --> C[Download<br/>import template]
C --> D[Upload sheet]
D --> E[Map columns]
E --> F{Validation<br/>preview}
F -->|errors| G[Download<br/>correction file]
G --> D
F -->|valid rows| H[Import]
H --> I[Bulk photo<br/>upload]
I --> J[Onboarding<br/>tracker %]
J --> K[Invite team]

```

Target: 240 boards to 60%+ complete in 5 working days with under 2 hours of the owner's time. The tracker should nudge the next missing item (GPS, photo, rate, permit, agreement).

Flow 2 — Vacancy loop, the signature flow (V1.0 internal, V2.0 public)

flowchart LR

```

A[Agreement ends<br/>30 Sep] --> B[60 days: sales alert<br/>+ renewal task]
B --> C{Renewed?}
C -->|yes| D[Extend agreement<br/>listing withdrawn]
C -->|no| E[30 days: face shows<br/>Available from 01 Oct]
E --> F[Marketplace listing<br/>campaign still live]
F --> G[Enquiry / hold]
G --> H[New agreement<br/>from 05 Oct]

```

If the face has an expired permit, step E raises a compliance alert instead of listing.
Screens: dashboard upcoming vacancies, Board 360 occupancy timeline, enquiries inbox.

Flow 3 — Permit renewal (V1.0)

flowchart LR

```
A[90 / 60 / 30 / 15 / 7<br/>day alerts] --> B[Open permit<br/>from alert]
B --> C[Mark under renewal<br/>+ application date]
C --> D[Upload new<br/>certificate]
D --> E[Old record<br/>superseded]
E --> F[Status valid]
A -->|no action by expiry| G[Expired: face<br/>unpublished]
G --> H[Daily critical alerts]
H --> C
```

Every alert must deep-link to the exact permit, with renewal as the primary action.

Flow 4 — Enquiry, price request and hold (V2.0)

flowchart LR

```
A[WhatsApp alert:<br/>new enquiry] --> B[Enquiries inbox<br/>24 h
countdown]
B --> C[Open enquiry:<br/>boards, dates, budget]
C --> D{Available?}
D -->|yes| E[Reply with rate<br/>or quote]
D -->|no| F[Decline + suggest<br/>alternatives]
E --> G{Hold requested?}
G -->|accept| H[Set hold length<br/>48 h to 7 days]
G -->|decline| I[Released]
B -->|24 h passed| J[Escalate to admin]
```

Price-on-request replies use the same inbox with the same countdown.

Flow 5 — Media plan to campaign (V2.1)

flowchart LR

```
A[Brief received] --> B[Map: filter city,<br/>dates, budget]
B --> C[Select faces<br/>into plan]
C --> D[Discounts, printing,<br/>GST totals]
D --> E[Export PDF / PPTX]
D --> F[Share client link]
F --> G[Client approves<br/>or rejects sites]
G --> H[Convert to campaign]
H --> I[Quotation<br/>V3.0]
```

Target: 20 boards to a client-ready proposal in under 10 minutes.

Flow 6 — Quote to cash (V3.0)

```

flowchart LR
    A[Quotation] --> B{Accepted?}
    B -->|revise| A
    B -->|yes| C[Booking + faces<br/>locked]
    C --> D[Agreement from<br/>template]
    D --> E[E-sign]
    E --> F[GST invoice]
    F --> G[Payment link]
    G --> H[Paid: occupancy<br/>updated]
    H --> I[Install tasks<br/>+ proof]
  
```

Flow 7 — Incident to resolution (V1.1 capture, V4.0 dispatch)

```

flowchart LR
    A[Report: web, field<br/>app or client] --> B[Category + severity<br/>+ photos]
    B --> C{Face occupied?}
    C -->|yes| D[Notify account<br/>manager]
    C --> E[Assign technician<br/>V4.0 auto]
    E --> F[Fix + after photo]
    F --> G[Supervisor verifies]
    G --> H[Closed; client<br/>sees evidence]
  
```

Flow 8 — Special offer push (V2.1)

```

flowchart LR
    A[Upcoming vacancies<br/>or board list] --> B[Select faces]
    B --> C[Create offer:<br/>type, value, end date]
    C --> D[Pick audience: past<br/>clients, saved searches]
    D --> E[Preview email<br/>+ WhatsApp]
    E --> F[Send]
    F --> G[Offer badge<br/>on listings]
    G --> H[Track opens<br/>+ enquiries]
  
```

Manage — screen-by-screen features

The dashboard and Board 360 are the two most important screens: the dashboard earns the daily login, and Board 360 is the sales demo.

Board 360 tabs

Tab	Shows	Main actions	From
Header	Board code, name, type; lifecycle, compliance and occupancy badges	Edit, retire, print QR, share	V1.0 (health score V4.0)
Overview	Map pin, address, ward, road, directions; faces with size, lighting, orientation, card rate	Add face, edit specs, update rate	V1.0
Gallery	Day, night and approach photos with capture dates	Upload, set cover photo	V1.0
Occupancy	Timeline of past, current and future periods per face with client names; pre-listing marker	Add agreement, add block	V1.0
Compliance	Each clearance: authority, expiry, status, document	Add permit, mark under renewal, upload renewal	V1.0
Agreements	Current and past contracts, values, documents	Open, extend, terminate	V1.0
History	One timeline of campaigns, tax receipts, electricity bills, maintenance	Filter by type, upload record	V1.0 (amounts V4.0)
Documents	All files, versioned	Upload, view versions	V1.0
Activity	Every change: who, what, when, from, to	Filter, export CSV	V1.0
Incidents	Open and past issues with photos	Report incident	V1.1

Tab	Shows	Main actions	From
Proof	Installation evidence per campaign	Generate proof pack	V1.1
Marketplace	Published state, views, enquiries, active offer	Publish / unpublish, create offer	V2.0
Costs	Lease, rent, electricity, payouts	Add lease, add bill	V4.0
Profitability	Revenue minus costs, occupancy %, vacancy loss	Export	V4.0

Tabs for later versions appear from V1.0 as empty states that explain what is coming.

All Manage screens

Screen	Purpose	Key features and components	From
Dashboard	Daily snapshot per role	KPI cards (faces, occupied, vacant, occupancy %, trend); risk strip; contracts ending 30 / 60 / 90 days with value; live campaigns list; upcoming vacancies; vacancy loss worst-first; portfolio map	V1.0
Board list	Find and bulk-act on boards	Table with three status badges, filters (city, type, status, completeness), saved views, bulk edit, export	V1.0
Board map	See the portfolio spatially	Clustered pins coloured by occupancy or compliance toggle; side panel preview; draw to select	V1.0

Screen	Purpose	Key features and components	From
Add / edit board	Register a structure	Stepper: location (pin drop or paste map link) → structure type → faces → photos → rates → permits; save as draft	V1.0
Bulk import	Onboard many boards at once	Upload, column mapping, row-level error preview, correction file download, summary	V1.0
Onboarding tracker	Push data completeness	Progress rings for GPS, photo, rate, permit, agreement; list of boards missing each	V1.0
Upcoming vacancies	Sell before boards go empty	Faces ending in 30 / 60 / 90 days, free-from date, card rate, pre-listed flag; create offer	V1.0 (offers V2.1)
Risk dashboard	Stop permit lapses	Counts for expired, expiring 30 days, missing; drill-down list; bulk mark under renewal	V1.0
Permits list	All clearances	Filter by type, authority, expiry window, status; renewal queue view	V1.0
Document vault	Every file in one place	Search by ref no., type, authority, expiry; version chain; secure download	V1.0
Clients	Advertiser companies	List + client detail with contacts, agreements, spend; reminder opt-in	V1.0 (Client 360 V2.1)

Screen	Purpose	Key features and components	From
Agreements	Commercial contracts	List with expiry filter; detail with line items per face, versions, documents; overlap error inline	V1.0
Revenue dashboard	Money view	Contracted revenue by month, board, client, district; revenue per board table	V1.0 (invoiced vs collected V3.0)
Notification centre	All alerts	Grouped by priority; acknowledge; deep-link to entity; preferences and digest	V1.0
Users and roles	Access control	Invite with role, geography scope, deactivate, audit of changes	V1.0
Settings	Configuration	Company profile, alert thresholds, board and clearance types, notification rules	V1.0
Incidents	Track issues	List by severity and age; detail with lifecycle stepper, photos, after-photo gate	V1.1
Proof of display	Evidence review	Per-campaign capture grid (day / night / approach / close-up); out-of-radius flags; proof-pack builder	V1.1
Enquiries inbox	Respond to buyers	Split view: list with SLA countdown, detail with boards, dates, budget; reply with rate; accept / decline hold	V2.0

Screen	Purpose	Key features and components	From
Marketplace settings	Control public view	Rate display (card rate, band, on request), pre-listing window, hold defaults, response time	V2.0
Campaigns	Multi-board bookings	List; Gantt across faces; add / remove faces; extend, reduce, cancel	V2.1
CRM pipeline	Sales tracking	Kanban stages with loss reasons; lead detail; renewal tasks; communication log	V2.1
Media plan builder	Proposals in minutes	Map + list picker with availability, plan cart, discounts, totals with GST, PDF / PPTX export, share link with view tracking	V2.1
Special offers	Fill vacancies	Offer list; create offer (faces, type, value, end date, audience); send preview; results	V2.1
Quotations and bookings	Close deals	Quote builder, versions, approval threshold, e-sign status, booking detail	V3.0
Invoices and payments	Get paid	GST invoice preview, payment links, receipts, credit notes, ageing report, commission statement	V3.0
Work orders	Field dispatch	Scheduling board by technician and area with drag-and-drop; SLA timers; performance	V4.0
Leases and expenses	True costs	Landowner list, lease detail with escalation, rent due calendar, utility bills	V4.0

Screen	Purpose	Key features and components	From
Profitability	Which boards make money	Net margin by board, district, client; loss-making boards list	V4.0
Health score	Prioritise attention	Worst 20 boards this week; score history per board	V4.0
BI and insights	Intelligence	Heatmaps, report builder, price suggestions with explanation and override	V5.0

Marketplace — navigation and sitemap

Marketplace has a public area anyone can browse and an account area behind OTP sign-up. Most visitors arrive on an SEO landing page, not the home page, so every landing page needs a search bar and map entry point.

```

flowchart LR
    G[Google search] --> L[City / area<br/>landing page]
    H[Home] --> S[Map search]
    L --> S
    S --> D[Listing detail]
    D --> C[Cart]
    C --> Q[Quote request]
    Q --> I[Inbox + quotes]
    I --> K[Checkout V3.0]
    K --> P[Campaign portal]

```

The header carries location search, Cart (with count), Inbox and Sign in / Account on every page.

Area	Pages	Access	From
Public	Home · Map search · Listing detail	Anyone (exact coordinates for verified users only)	V2.0
Public	Landing pages: city, locality, highway, format, city × format	Anyone, SEO-indexed	V2.0

Area	Pages	Access	From
Public	Content hub: rate guides, explainers, permit guidance, case studies	Anyone	V2.0
Public	About, neutrality policy, terms, privacy, listing policy, help	Anyone	V2.0
Account	Sign up / sign in (email or mobile OTP) · Company profile	Advertiser	V2.0
Account	Cart · Combined quote view · Inbox (enquiries, price requests, replies) · Holds · Saved searches	Advertiser	V2.0
Account	Shared plan view (from an owner's link)	Link holder	V2.1
Account	Offers (filter and badges)	Anyone	V2.1
Account	Consolidated quote · Checkout and paid block · E-sign · Campaigns portal · Invoices and receipts · Team members	Advertiser	V3.0
Agency	Client workspaces · Agency-branded quotes with commission · Commission report	Verified agency	V4.0
Account	Audience and impressions on listings and plans	Advertiser	V5.0

Marketplace — key user flows

The buyer promise is thirty phone calls and three weeks turned into one afternoon on a laptop. Browsing and adding to cart need no account; sign-up is asked for only at the first request.

Flow A — Discover to cart (V2.0)

```

flowchart LR
    A[Landing page or<br/>location search] --> B[Map + list]
    B --> C[Filters: dates, type,<br/>size, lit, budget]
    C --> D[Listing detail]
    D --> E{Price shown?}
    E -->|yes| F[Add to cart]
    E -->|on request| G[Add to cart<br/>price pending]
    F --> B
    G --> B
    F --> H[Cart: boards from<br/>many owners]
  
```

The availability date range is the key filter: once set, results show only faces free for the whole period, and the cart remembers it.

Flow B — Cart to full quote (V2.0; single document V3.0)

```

flowchart LR
    A[Cart] --> B[Request full quote]
    B --> C{Signed in?}
    C -->|no| D[OTP sign-up<br/>+ company]
    D --> E
    C -->|yes| E[Confirm dates,<br/>budget, notes]
    E --> F[Split into one<br/>request per owner]
    F --> G[Inbox: replies<br/>with countdown]
    G --> H[Combined quote<br/>view + total]
    H --> I[Consolidated quote<br/>PDF V3.0]
  
```

The buyer sees one request; each owner sees only their own boards. Show per-owner status (waiting, replied, declined) inside the combined view.

Flow C — Price on request (V2.0)

```

flowchart LR
    A[Listing: price<br/>on request] --> B[Request price]
    B --> C[Countdown shown:<br/>reply due in 24 h]
    C --> D{Owner replied?}
    D -->|yes| E[Price appears in<br/>cart + inbox]
    D -->|late| F[Buyer told it is late;<br/>similar boards shown]
  
```

Flow D — Hold and paid block (V2.0 free hold, V3.0 paid block)

flowchart LR

```

A[Quote received] --> B{Need time?}
B -->|free hold| C[Request hold]
C --> D{Owner accepts?}
D -->|yes| E[Dates locked<br/>48 h to 7 days]
E --> F[Reminder 6 h<br/>before expiry]
B -->|paid block V3.0| G[Pay advance]
G --> H[Dates locked for<br/>owner's block term]
F --> I[Book]
H --> I

```

Always show what the buyer gets and loses: lock end time, advance amount, and refund policy before payment.

Flow E — Book and pay (V3.0)

flowchart LR

```

A[Consolidated quote] --> B[Accept all<br/>or per board]
B --> C[Agreements generated<br/>per owner]
C --> D[E-sign on mobile]
D --> E[GST invoices]
E --> F[Pay: UPI, card,<br/>net banking]
F --> G[Booking confirmed]
G --> H[Campaign portal]

```

A multi-owner cart produces one agreement and invoice per owner; the design should group them under one checkout so it still feels like one purchase.

Flow F — Campaign portal and proof (V3.0)

flowchart LR

```

A[Campaign portal] --> B[Sites: pending,<br/>live, done]
B --> C[Proof photos arrive<br/>day, night, approach]
C --> D[Download<br/>proof pack]
B --> E[Report a problem]
E --> F[Incident in owner's<br/>Manage]
F --> G[Fix evidence<br/>back to portal]

```

Flow G — Agency quote with commission (V4.0)

flowchart LR

```

A[Agency sign-up] --> B[Platform verifies]
B --> C[Create client<br/>workspace]
C --> D[Build cart for client]
D --> E[Owner quotes<br/>at net rates]
E --> F[Add agency<br/>commission]
F --> G[Agency-branded<br/>quote to client]

```

Marketplace — screen-by-screen features

Map search and Listing detail decide whether buyers trust the platform. Every listing must show when its photos were taken and whether its permits are valid.

Listing detail anatomy

Block	Shows	Actions	From
Gallery	Day, night, approach photos with "taken on" date	Swipe, full screen	V2.0
Title bar	Format, locality, board code; Verified badge; offer badge	Share	V2.0 (offer V2.1)
Price	Card rate, rate band or "Price on request" with reply-time promise	Add to cart, request price	V2.0
Availability	180-day calendar (available, booked, on hold); "Available from <date>" badge	Pick campaign dates	V2.0
Specs	Size and sq ft, lighting, orientation, visibility distance, traffic direction, road type	—	V2.0
Location	Map pin, landmark, approximate address; exact coordinates for verified users	Open in maps	V2.0

Block	Shows	Actions	From
Trust	Last verified date, permit-valid mark, owner response time	—	V2.0 (owner rating V3.0)
Actions bar	Sticky on mobile	Add to cart, request quote, request hold, download site PDF	V2.0
Nearby	Similar and nearby boards	Add to cart	V2.0 (Should)
Past advertisers	Brand names and months, owner opt-in only	—	V5.0
Audience	Traffic and impression estimates, labelled as estimates	—	V5.0

All Marketplace screens

Screen	Purpose	Key features and components	From
Home	Start a search	Location search with autocomplete, date range, format chips; live counter (boards · verified owners · cities); featured cities; how it works	V2.0
Landing page (city / area / format)	Rank on Google and convert	H1 with city and format; live inventory count; price range; embedded map; sample sites; FAQ; internal links; "Search this area" CTA	V2.0

Screen	Purpose	Key features and components	From
Map search	Find boards	Full-screen clustered map; synced list; filter drawer (city, locality, road, type, size, lighting, dates, budget, orientation, verified, on offer); sort; draw area; radius around landmark; URL keeps filters	V2.0 (offers V2.1)
Listing detail	Evaluate one board	See anatomy table above	V2.0
Cart	Collect boards across owners	Grouped by owner or city toggle; campaign dates; indicative total; price-pending items; remove; request full quote	V2.0
Sign up / sign in	Verify buyer	Email or mobile OTP; company name; optional GST; appears inline at first request	V2.0
Inbox	All conversations	Tabs for quotes, price requests, holds; per-owner thread; countdown chips; status (waiting, replied, declined, late)	V2.0
Combined quote view	Compare and total	Per-owner rows with quoted rate, printing and mounting, validity; running total; swap declined boards	V2.0
Holds	Track locked dates	Hold list with time left; extend request; convert to booking	V2.0
Saved searches	Get alerts	Saved filter sets, email alert toggle	V2.0 (Should)

Screen	Purpose	Key features and components	From
Shared plan view	Review an owner's proposal	Map + site cards; approve or reject per site; comments	V2.1
Consolidated quote	One document for the cart	PDF preview with GST; accept all or per board	V3.0
Checkout	Pay and lock	Summary per owner; paid block or full payment choice; UPI, card, net banking; refund policy shown	V3.0
E-sign	Sign agreements	Agreement preview per owner; Aadhaar eSign; signing status	V3.0
Campaign portal	Watch the campaign run	Campaign list; per-site status; proof photos as they arrive; proof pack download; report a problem	V3.0
Invoices and receipts	Paperwork	Invoice list, GST details, payment status, downloads	V3.0
Team	Agency / brand members	Invite sub-users, roles	V3.0
Agency workspace	Manage end clients	Client switcher; per-client carts, plans, campaigns; commission settings; branded quote	V4.0
Content hub	Educate and rank	Rate guides, explainers, case studies with proof photos	V2.0

Handoffs between Manage and Marketplace

Every buyer action in Marketplace lands as a task in Manage, and every owner reply shows up in the buyer's inbox. Design both ends of each handoff together so wording and statuses match.

sequenceDiagram

```

participant B as Buyer (Marketplace)
participant P as Platform
participant O as Owner (Manage)
B->>P: Request full quote for cart
P->>O: One enquiry per owner + WhatsApp
O->>P: Reply with rate or decline
P->>B: Reply in inbox, total updated
B->>P: Request hold
P->>O: Hold request
O->>P: Accept, set duration
P->>B: Dates locked, timer starts
B->>P: Accept quote and pay (V3.0)
P->>O: Booking confirmed, occupancy updated
O->>P: Proof photos from field
P->>B: Proof in campaign portal

```

Handoff	Buyer sees (Marketplace)	Owner sees (Manage)	Shared status words	From
Full quote request	One request, per-owner status	One enquiry with only their boards, 24 h countdown	Waiting · Replied · Declined · Late	V2.0
Price on request	Countdown on listing and in cart	Price-request inbox item with deadline	Waiting · Replied · Late	V2.0
Hold	Lock end time and reminder	Accept / decline, duration picker	Requested · Held · Expired · Released · Converted	V2.0
Pre-listing (vacancy loop)	"Available from <date>" badge	Pre-listed flag on Board 360 and upcoming vacancies	Available from	V2.0
Permit expired	Listing disappears; cart item marked unavailable	Critical compliance alert	Unavailable	V2.0
Special offer	Offer badge, end date, filter	Offer results: views, enquiries	On offer · Ends <date>	V2.1

Handoff	Buyer sees (Marketplace)	Owner sees (Manage)	Shared status words	From
Paid block and booking	Checkout, receipt, campaign created	Booking, invoice, commission statement	Pending payment · Confirmed · Cancelled	V3.0
Proof of display	Photos in campaign portal	Proof captured in field app	Pending install · Live · Completed	V3.0
Problem report	Issue raised with photo	Incident with client flagged as reporter	Reported · In progress · Resolved	V3.0

States, empty states and edge cases

Every screen needs loading, empty, error and no-permission states designed, not just the happy path. The cases below are specific to this product and most likely to be missed.

App	Situation	What the design must do
Manage	New tenant with no boards	Dashboard shows an onboarding checklist (import, photos, permits, invite team) instead of empty charts
Manage	Later-version tab on Board 360	Friendly empty state explaining what the tab will hold
Manage	Board active + permit expired + occupied	All three badges visible; compliance badge in red; alert banner on Board 360
Manage	Overlapping agreement on a face	Inline error naming the conflicting agreement, with a link to it
Manage	Import with bad rows	Valid rows commit; clear count of failed rows; download correction file; never force full re-upload
Manage	Duplicate board within 25 m	Warning with side-by-side comparison; merge or keep both
Manage	Quoting a face with expired permit	Blocked; admin-only override with reason field

App	Situation	What the design must do
Manage	Enquiry past 24 h	Countdown turns red, "Late" chip, escalation notice to admin
Manage	Role cannot see floor rate or cost	Field removed, not blurred or disabled
Manage	Retire a board	Confirmation with reason and date; board stays in history and reports
Marketplace	Search with no results	Suggest widening dates, radius or budget; show nearest available boards
Marketplace	Face booked or unpublished while in cart	Cart item marked unavailable with reason; offer similar boards
Marketplace	Owner declines or replies late	Status chip in combined quote; one-tap swap for a nearby board
Marketplace	Hold expires	Notice in inbox and email; dates released; option to re-request
Marketplace	Price on request with no reply	Late chip; board stays in cart without a price; similar priced boards shown
Marketplace	Stale photos (over 12 months)	Show capture date prominently; no hiding of age
Marketplace	Guest tries to request a quote	Inline OTP sign-up; cart and dates preserved
Marketplace	Slow 4G on mid-range Android	List-first fallback while map loads; compressed images; skeleton loaders
Marketplace	Payment fails (V3.0)	Clear reason, retry, alternate method; locks not lost during retry window

Open design questions

These need a product decision before or during design; each changes screens, not just copy.

#	Question	Screens affected	Current assumption in this doc
1	Can guests build a cart without an account, or is sign-up required first?	Cart, sign-up, listing actions	Guest cart; OTP sign-up at first request
2	Does the platform collect one payment for a multi-owner cart, or does each owner get paid separately (PRD open item OQ-5)?	Checkout, paid block, invoices	One checkout screen grouping a separate agreement and invoice per owner
3	Default rate display on listings: card rate, band or on request?	Listing detail, map pins, cart totals	Card rate by default, owner can override
4	Should map pins show price, or only format and status?	Map search	Format icon on pin, price in side panel
5	What is the maximum hold and paid-block length buyers can see?	Holds, checkout	Free hold 48 h to 7 days; paid block term set by owner
6	Who can send special offers to past clients, and how often?	Special offers, notification rules	Sales Executive and Admin; frequency cap to be set
7	Which regional languages come first, and for which app?	All Marketplace pages, field-facing screens	English at launch; Malayalam assessed first for Kerala
8	Does the brand stay HOARDINGS360, or move under a broader parent brand (PRD OQ-8)?	Logo, headers, landing pages, emails	HOARDINGS360

Recommended design order: Manage dashboard and Board 360, import and onboarding tracker, permits and risk dashboard, then Marketplace map search, listing detail, cart and inbox ahead of the V2.0 launch.
